# Procedure for deciding How to Make Changes

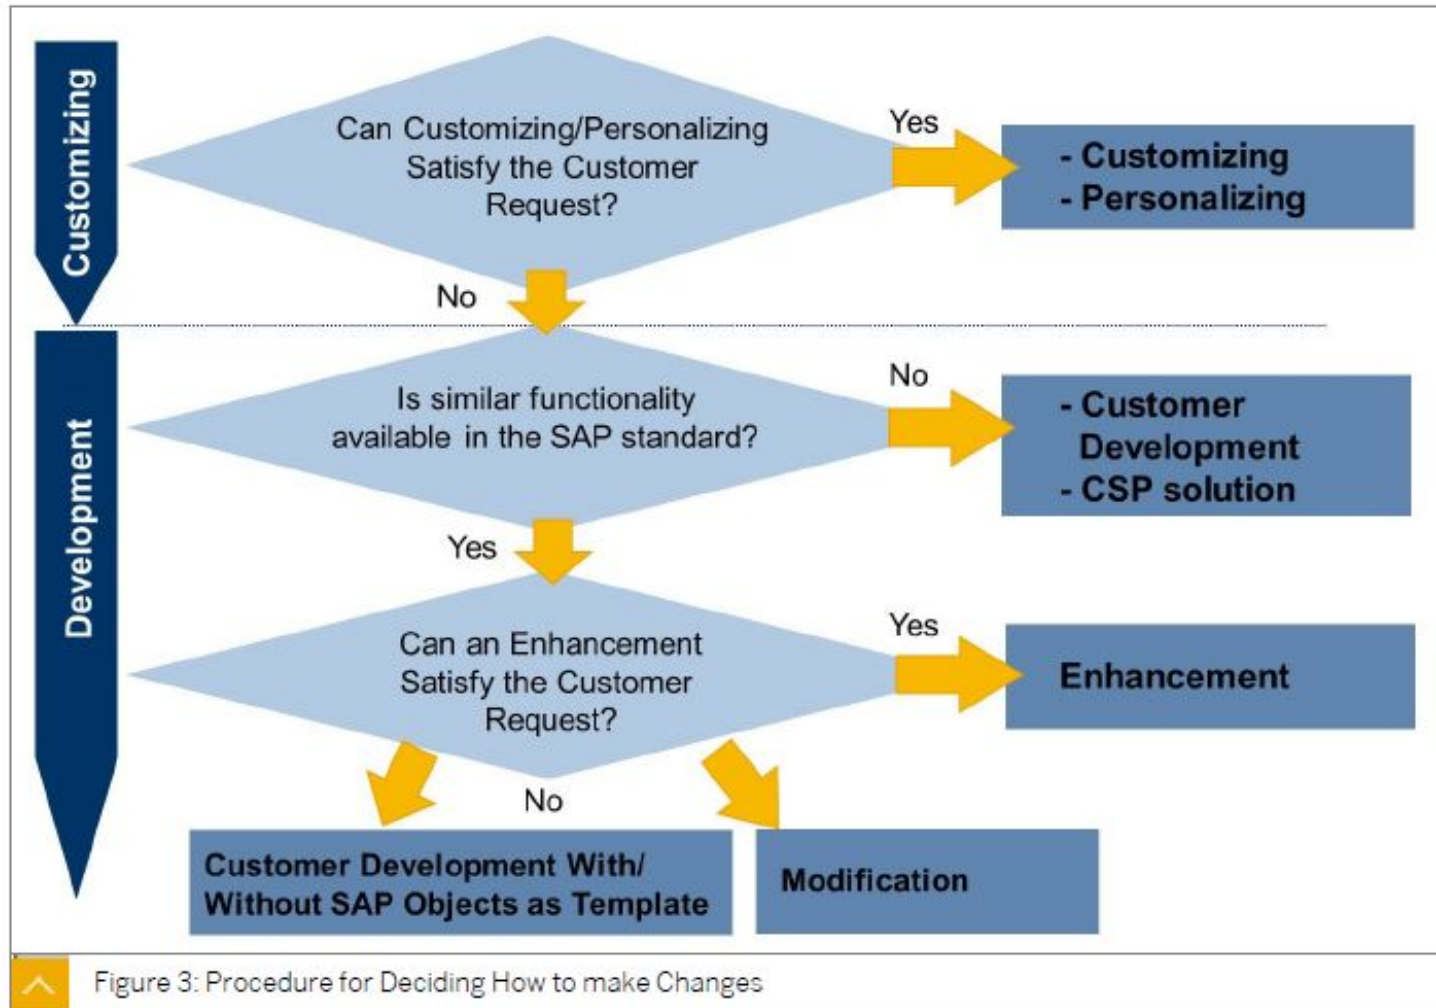

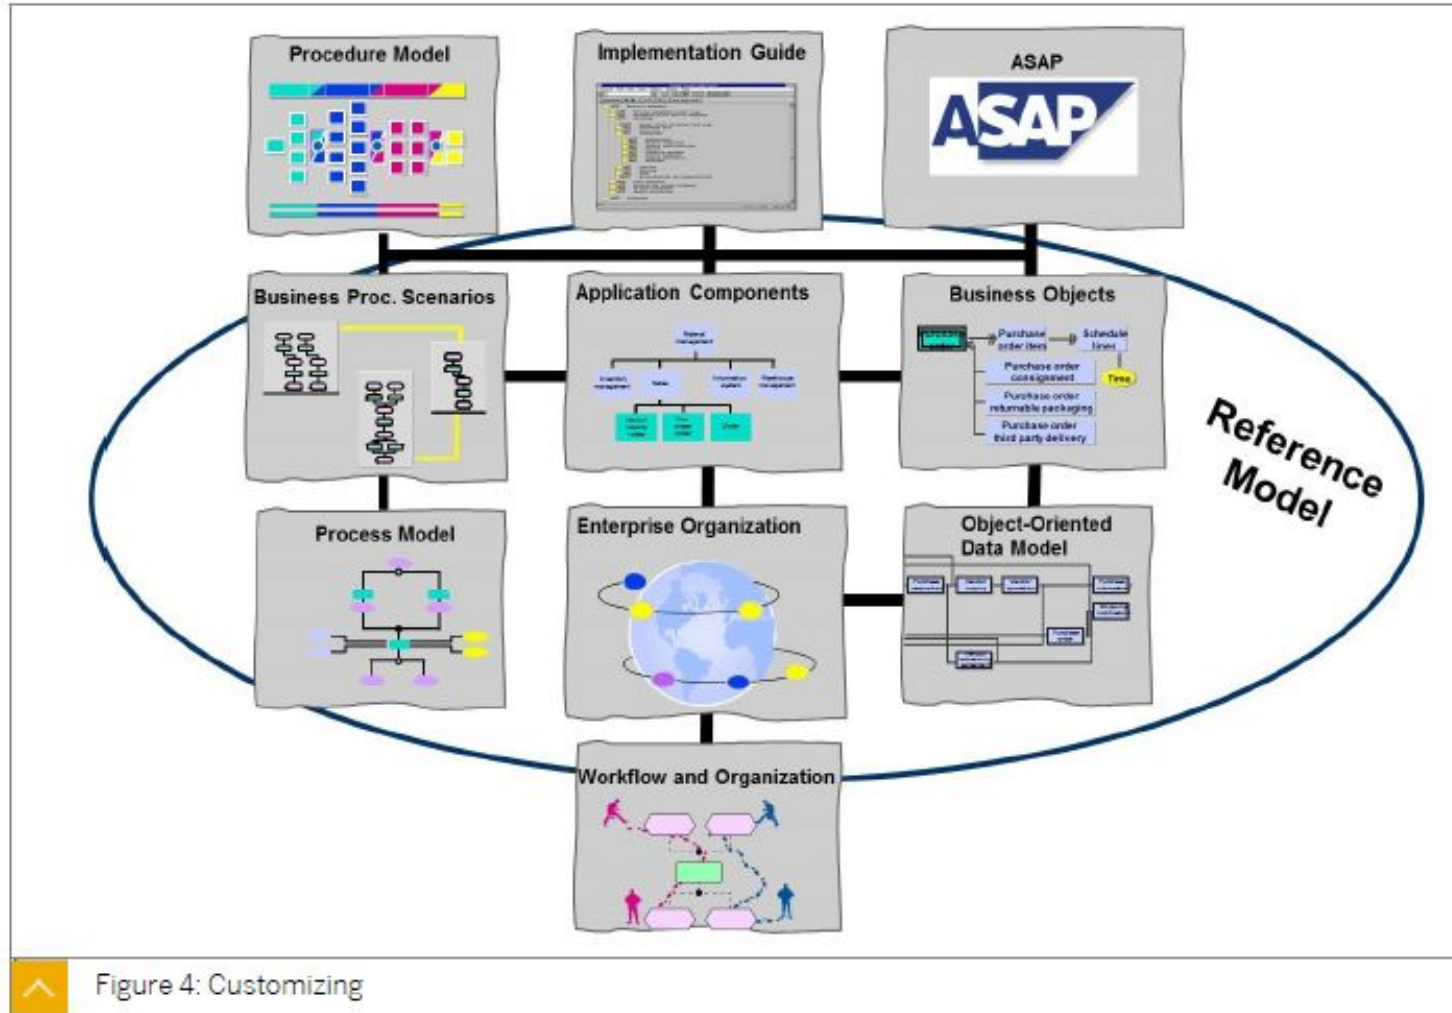

Figure 3: Procedure for Deciding How to make Changes

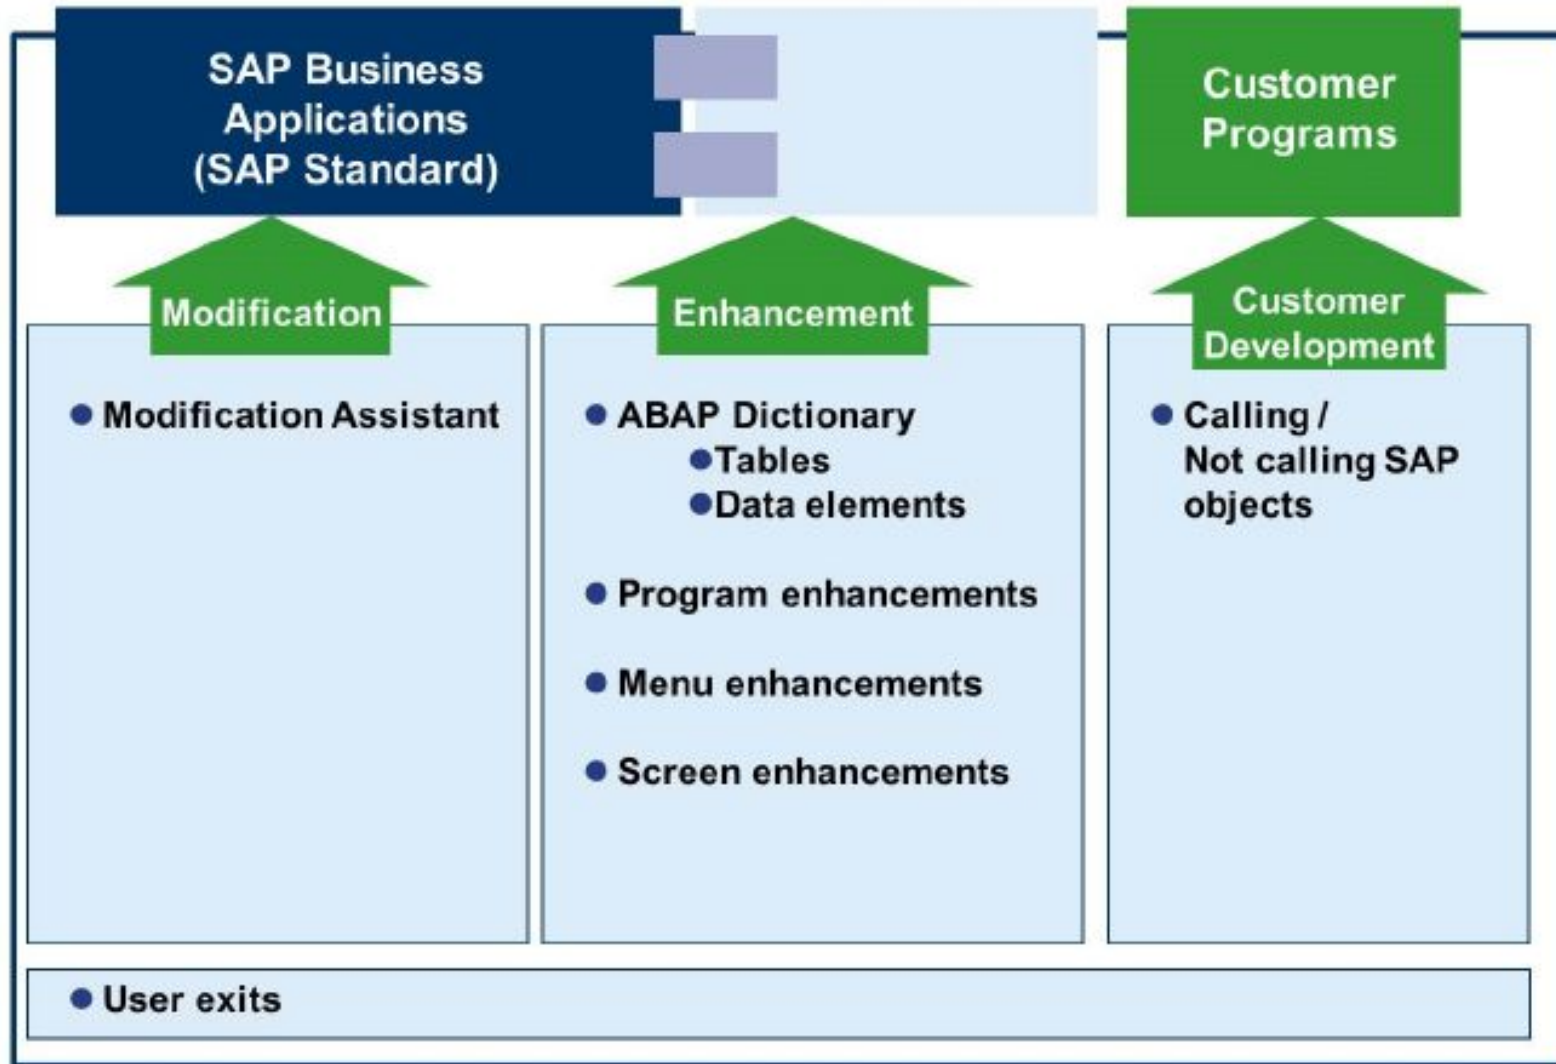

# Customizing

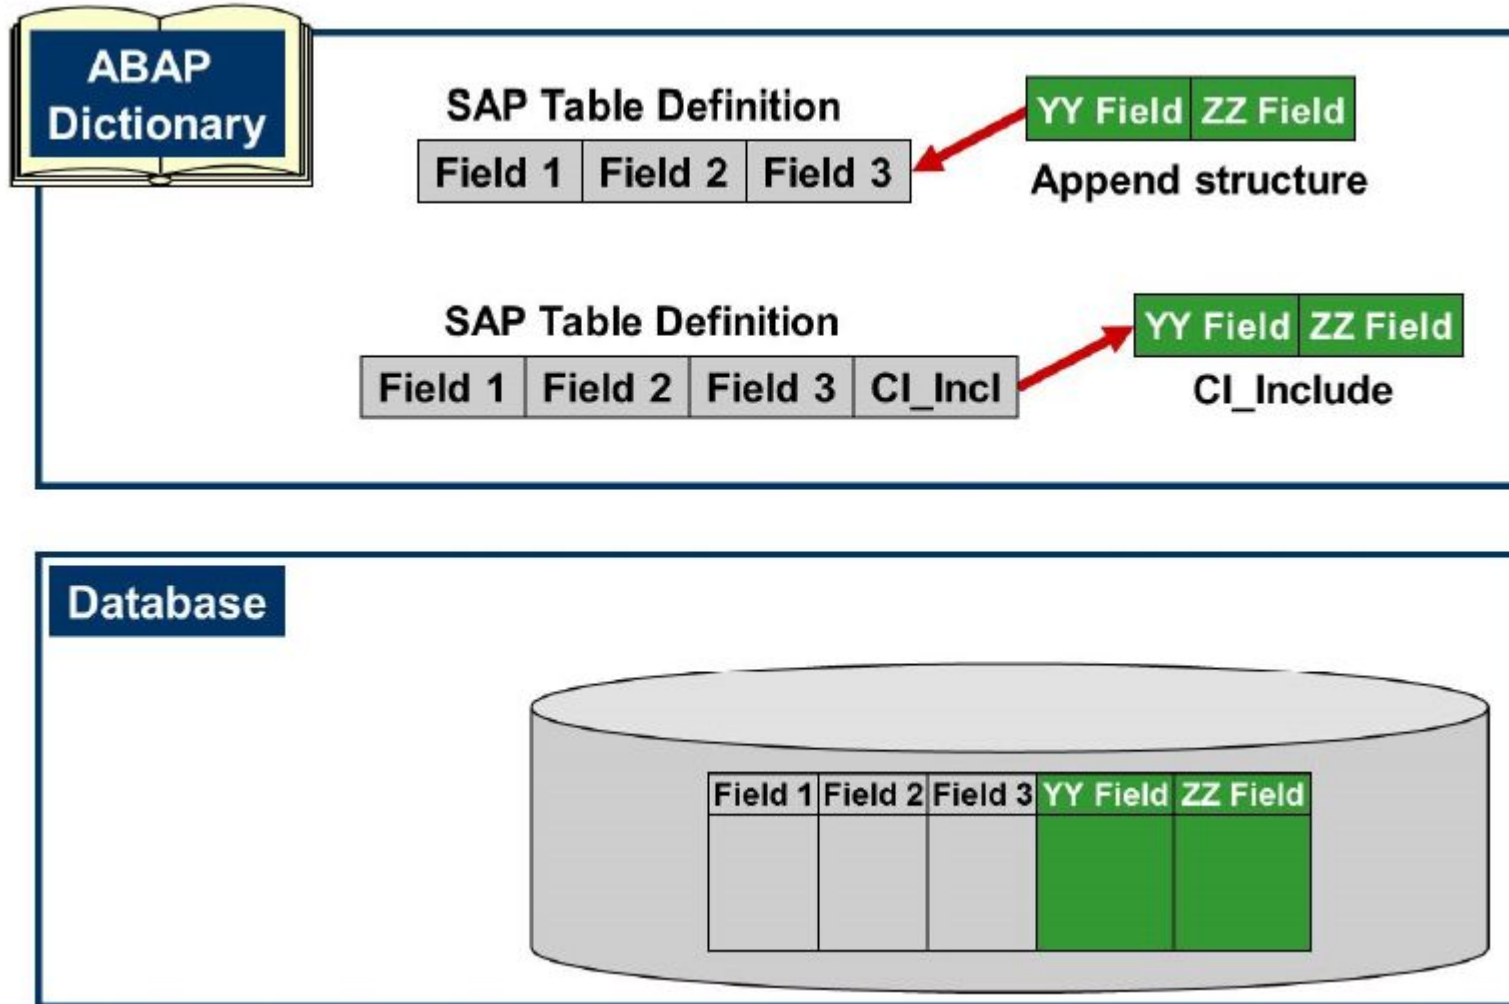

# Personalization

- Examples of how Personalization is Achieved
  - Screen field properties can be controlled using:
    - Variant transactions
    - SET/GET parameters
    - User-dependent or client-dependent table control settings
- Personalized menus
  - Role-based menus
  - Favorites
  - Shortcuts on your desktop
